### 5. FIRE-FIGHTING MEASURES

**Suitable Extinguishing Media**

Carbon dioxide (CO2). Foam. Dry chemical. Water can be used to cool containers exposed to fire.

**Unsuitable Extinguishing Media** Do not use a water jet or high-pressure stream.

**Specific Hazards Arising from the Chemical**

Not determined.

**Hazardous combustion products** Smoke, irritating fumes and vapors, unidentified organic compounds, aldehydes, hydrogen sulfide, alkyl mercaptans, sulfides and oxides of carbon and sulfur. Under combustion conditions, oxides of phosphorus, calcium, sodium sulfur and zinc will form.

**Protective equipment and precautions for firefighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Avoid water stream or molten burning material as it may scatter and spread the fire. Take no action involving personal risk or without suitable training. Do not release chemically contaminated water into drains, soil or surface water.

## 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures**

**Personal Precautions** Evacuate personnel to safe areas. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid contact with skin, eyes or clothing. Use personal protection recommended in Section 8. Ensure adequate ventilation, especially in confined areas.

**Environmental precautions**

**Environmental precautions** See Section 12 for additional Ecological Information.

**Methods and material for containment and cleaning up**

**Methods for Containment** Stop leak if you can do it without risk.

**Methods for Clean-Up** Contain spilled material. Absorb spill with inert material (i.e. dry sand or earth). Sweep, scoop or vacuum the discharged material. Seal absorbent material in a closed labeled container for disposal. Large spills: Stop spill and dike area to prevent spreading. Pump liquid to salvage tank. Remaining liquid may be taken up on sand, clay, earth or other absorbent material and shoveled into containers. Do not use combustible materials, such as saw dust. Seal containers for later disposal.

## 7. HANDLING AND STORAGE

**Precautions for safe handling**

**Advice on Safe Handling** Handle in accordance with good industrial hygiene and safety practice. Avoid breathing dust/fume/gas/mist/vapors/spray. Use only outdoors or in a well-ventilated area. Avoid contact with skin, eyes or clothing. Use adequate ventilation. Do not eat, drink or smoke when using this product. Do NOT take internally. Wash face, hands and any exposed skin thoroughly after handling. Launder work clothing before reuse.

**Conditions for safe storage, including any incompatibilities**

**Storage Conditions** Store locked up. Store in a well-ventilated place. Keep container tightly closed. Store away from heat, sparks, flame. Do not reuse containers without proper cleaning or reconditioning. Empty container contains product residue which may exhibit hazards of the product. Store in a closed container away from incompatible materials. Do not store in unlabeled or mislabeled containers. Keep away from water and moisture. Storage temperature should not exceed 40°C (104°F) to maintain best product performance. 2-year shelf life.

**Incompatible Materials** Oxidizing agents. Reducing agent. Acids.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### Exposure Guidelines

### Appropriate engineering controls

#### Engineering Controls

If use generates mist or vapor, local exhaust ventilation is recommended. Additional ventilation or exhaust may be required to maintain air concentrations below exposure limits. Thermal processing operations should be ventilated to control fumes given off during processing. Showers. Eyewash stations.

### Individual protection measures, such as personal protective equipment

#### Eye/Face Protection

Safety glasses. If potential for splash or mist exists, wear chemical goggles or faceshield.

#### Skin and Body Protection

Use nitrile or neoprene gloves. Wear coveralls, apron and /or boots as necessary to minimize contact. Do not wear rings, watches or similar apparel that could entrap the material and cause a skin reaction. If handling hot product, ensure gloves, boots and clothing are heat resistant and insulated.

#### Respiratory Protection

Not usually necessary under conditions of normal use. If product is heated or misted, use respirator with a combination organic vapor and high efficiency filter cartridge if recommended exposure limit is exceeded. Use self-contained breathing apparatus for entry into confined space, for other poorly ventilated areas and for large spill clean-up sites. Consult with an industrial hygienist to determine the appropriate respiratory protection for your specific use of this material.

#### General Hygiene Considerations

Laundry contaminated clothing before reuse. Discard leather articles saturated with product. Wash face, hands and any exposed skin thoroughly after handling. Do not eat, drink or smoke when using this product.
